

«A Walk to the Abbey of San Michele»

EXPERIENCE

THE PLACE

An aerial photograph of a large, historic white building complex, likely a monastery or fortress, built into a hillside. The building features multiple stories with numerous windows and a prominent central section with a triangular pediment. The roofs are covered in reddish-brown tiles. The building is surrounded by lush green trees and vegetation. A stone wall runs along the base of the building, and a paved path leads up to it. The overall scene is set in a natural, wooded environment.
